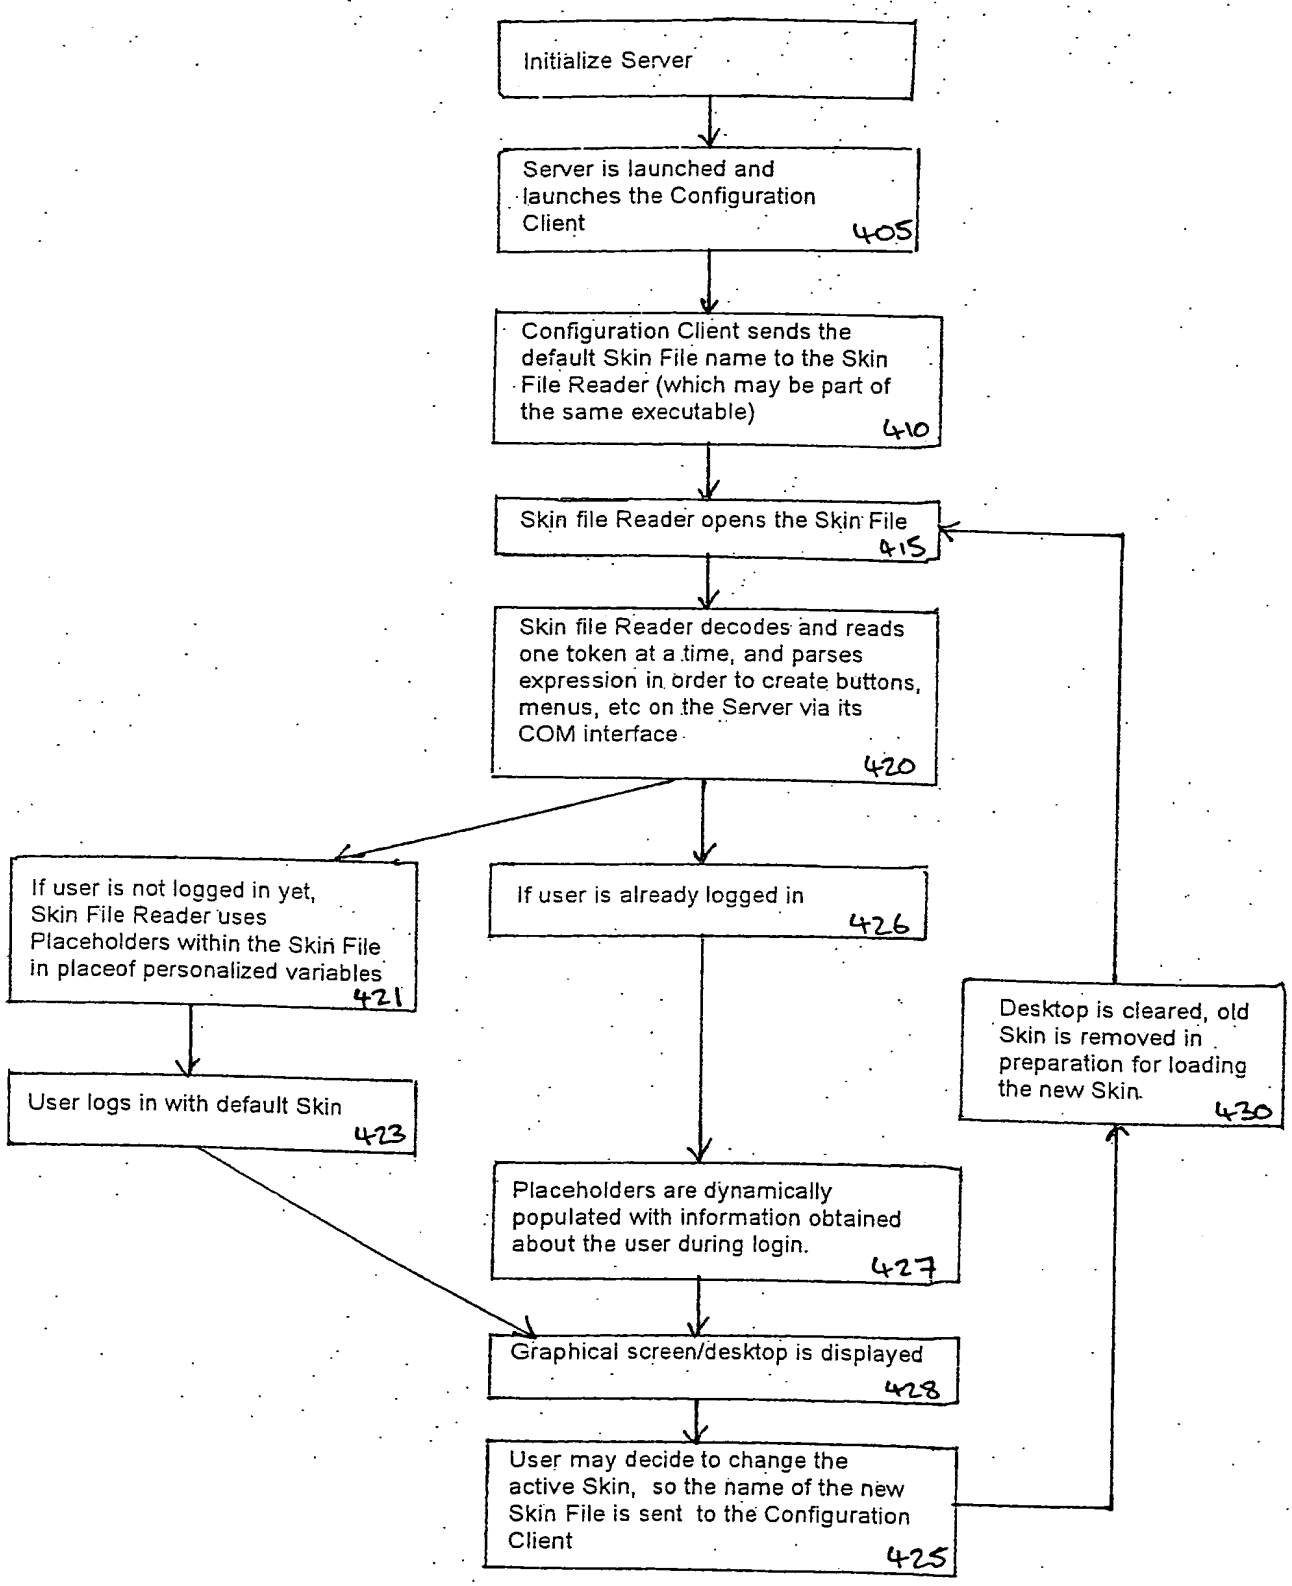
Knots, Trigonometric Functions, Plane Trigonometry...

FIGURE 3



Initialize Server
Server is launched and launches the Configuration Client
405
Configuration Client sends the default Skin File name to the Skin File Reader (which may be part of the same executable)
410
Skin file Reader opens the Skin File
415
Skin file Reader decodes and reads one token at a time, and parses expression in order to create buttons, menus, etc on the Server via its COM interface
420
If user is not logged in yet, Skin File Reader uses Placeholders within the Skin File in placeof personalized variables
421
User logs in with default Skin
423
If user is already logged in
426
Placeholders are dynamically populated with information obtained about the user during login.
427
Graphical screen/desktop is displayed
428
User may decide to change the active Skin, so the name of the new Skin File is sent to the Configuration Client
425
Desktop is cleared, old Skin is removed in preparation for loading the new Skin.
430
